Chief Brian Bennington *"Two Stations to Better Serve You"*

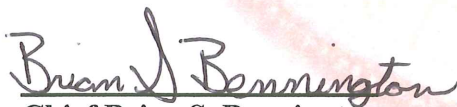

To: Whom it may concern

The Central Townships Joint Fire District began coverage for Somerford Township effective January 1st 2020. The District has moved a Class 1 Fire Engine into the station located at 91 State Route 56 and is staffed by three professionally certified Firefighters 24 hours per day. This Engine is 2000 gallon Pumper / Tanker with a 1250 GPM pump, ladders, attack hose, supply hose and extrication equipment. A new Fire Engine has already been approved by the Fire Board for the District and will allow us to have a second Engine in the Somerford Station by January of 2021.

I meet with ISO on January 22nd to review the ISO rating for Somerford Township as well as the other Townships in the District. All ISO information was updated and documentation was provided in an effort to lower Somerford Townships ISO rating. I feel that this was a very productive meeting and will end up benefiting all of the residents of the District.

It is the intention of the Fire District to provide each and every one of its residents with quality and professional fire protection at all times. If you have questions about the Fire District feel free to contact me at one of the numbers bellow:
